Team Name: NETRA 2K22	Team Members	Email Id	Contact No
<b>Problem Statement:</b> During video calls, often eye to eye contacts are missing because the camera and the screen are misaligned. During the calls, the tendency is to see on the screen and not in the camera, which leads to misaligned conversations. It is desired to design some mechanism to align both the video streams so that the conversations are effective. <b>IDEA ID:23161</b>	Shaikh Affan Rais Ahmed ( <b>Team leader</b> )	shaikhaffan810@gmail.com	8668568242
